IAGG 2017

The world meeting of the International Association of Geriatric and gerontology just started this week in San Francisco with almost 6000 participants, the larger congress from ever in the world. It demonstrates how fast the field of gerontology and geriatrics in growing worldwide both in the field of basic, clinical and social sciences. The new president is Pr J Rowe from NY. The opening ceremony started with a conference of Linda Fried on the new demography challenges with a disruptive and productive aging

Diabetes mitigates the role of memory complaint in predicting dementia risk: results from the prevention of alzheimer's disease with vitamin E and selenium study

Subjective Memory Complaints were more common among men with comorbidities, but these complaints appeared to be less predictive of dementia risk than those originating from men without comorbidities, suggesting that medical conditions such as diabetes may explain SMCs that are unrelated to an underlying neurodegenerative process.

Prevalence of frailty in nursing home residents according to various diagnostic tools

The prevalence of frailty is highly dependent on the diagnostic tool used. It would be necessary to reach a consensus on which diagnostic tools to use if one wishes to have comparable data obtained in epidemiological studies.
